

Product Description:

ACETECH™ CONTROL 20 Pro is our very latest multiple-signal, CAN bus control unit that incorporates all of the latest, cutting-edge features you require. It seamlessly integrates with other **ACETECH™** products through the **ACETECH™** CAN bus connection and provides the ability to monitor and log PRM, H-bridge, and soft-fusing output currents over time. It can also be easily scaled to continuously provide the most suitable functionality for your application needs.

ACETECH™ CONTROL 20 Pro

Key Features:

- 20x Total Outputs
- 12x Outputs ve+
- 8x Software Configurable ve+/ve-
- Operating Temperature: -40 - +85 C
- 4x Inputs (ve+/ve-/0-10V) Software Configurable
- Dedicated **ACETECH™** CAN bus interface
- Dedicated Vehicle CAN bus interface
- Majority of inputs obtainable through vehicle CAN bus
- Up to 4x CONTROL 20 Pros can be connected into a single system
- Can act as a control unit on its own with a HMI, or be part of a multimode network
- Dynamic and visually rich diagnostics via 3.5" color display
- 4GB of internal memory for onboard logging and configuration retainment
- Current sensing and monitoring on every output (accumulated history of current per output/ per appliance)
- PWM control on every output
- 4x H-Bridge channels for motor controls
- Modern design with an ultra small footprint
- Dimensions: 135x103x22 mm
- 12/24V compatible
