

TOUCH 5

The latest in switch panel innovations

Product Description:

The **ACETECH™ TOUCH 5** is one of the latest designs in the **ACETECH™** HMI range, bringing greater control, efficiency and reliability to emergency service personnel around the world. It brings together many different high-tech features, all packed neatly into a compact 5" touch display. It works in conjunction with the powerful **ACETECH™ CONNECT** as well as the **ACETECH™ CONTROL** modules, utilizing AMOLED technology display combined with a software driven configuration engine.

Product Features:

Multiple Functions, One Device

TOUCH 5 allows users to control all functions within the ambulance, while also providing critical information back to the paramedic.

Programmable

The screens are programmable based on the end users desired vehicle configuration. **ACETECH™** work with the Vehicle Builder to determine the config and functionality.

Improved User Experience

Intuitive UI, that enables richer user experience, as well as better sunlight readability, adaptive back light control through ambient light sensors, and the ability for user to override backlighting options during the night time driving.

Tactile Feel

Retention of critical buttons with tactile feed-back - siren & emergency lights, or interior lights full / dim.

Improved Serviceability

Easier replacement in field that would not require pre-programmed unit to be shipped to customer, blank unit will be able to take the configuration out of the existing system and reprogram itself to suit the overall system configuration.

Technical Data:

Display: 5" HD AMOLED display, 1280 x 720 resolution

Dimensions: (WxHxD) 138.2mm x 71.2mm x 16.2mm

Operating Voltage: 8 - 28V

Operating Temperature: -30° to 70°C

CPU: ARM Cortex-M4

RAM: 2GB

Comm: Voice recognition, humidity, temperature & ambient light sensor

VOUT: Voice announcements / alerts

Operating System: ACETECH™ O/S
